

Exploring the Bruker PAT Portfolio

Dr. David Trummer

Bruker Switzerland AG, BOPT, Industriestrasse 26 8117 Fällanden, Zürich, Switzerland,
david.trummer@bruker.com

Process Analytical Technology (PAT) is a powerful tool to investigate your chemistry at every stage of the reaction/process. Predicting process quality based on multivariate data analysis can help to optimize quality, time, and cost perspectives. Together, we will explore the advantages of PAT and walk through the Bruker Portfolio with a focus on FT-IR and Raman PAT solutions.

SCS SEMINAR ON FLOW AND PROCESS CHEMISTRY 2024
